## **Legislative Update**

Mr. Jim Layman, JD, Legislative Liaison, reviewed the following legislation:

### **Public Chapter 44**

This sunset provision extends the board of veterinary medical examiners until June 30, 2021.

### **Public Chapter 274**

This specifies that the practice of veterinary medicine does not include massage therapy to animals, which means the manipulation of the soft tissues of the animal body with the intention of positively affecting the health and well-being of the animal. Massage therapy does not include the diagnosis, treatment, correction, alleviation, or prevention of any animal disease, illness, pain, condition, etc. This law became effective on May 4, 2017, but will expire on July 1, 2018.

### **Public Chapter 350**

This will allow healthcare providers to satisfy one hour of continuing education requirements through the performance of one hour of voluntary provision of healthcare services. The maximum amount of annual hours of continuing education that a provider can receive through providing volunteer healthcare services is the lesser of 8 hours or 20% of the provider's annual continuing education requirement. The legislations allows for rulemaking by the division of health related boards in order to administer this section. This took effect on May 12, 2017.

### **Public Chapter 215**

This will require state governmental entities that establish or adopt guides to practice to do so through the promulgation of rules, rather than policy. The rules so promulgated must specify all provisions included in and relating to the guide to practice. Any changes to guides to practice

made after the guides are adopted must also be promulgated by rule in order to be effective. For purposes of this part, guides to practice includes codes of ethics and other quality standards, but does not include tests, examinations, building codes, safety codes, or drug standards. This legislation took effect on April 28, 2017.

### **Public Chapter 240**

This legislation was brought by the Department of Health and was designed to address a number of issues throughout all licensing boards, committees, and councils. This legislation will:

- Insure the integrity of licensure examinations by making examination questions, answer sheets, scoring keys, and other examination data confidential and closed to public inspection.
- Allow the issuance of limited licenses to applicants who have been out of clinical practice or inactive, or who are engaged in administrative practice. Limited licenses may be of restricted scope, restricted duration, and have additional conditions placed upon them in order to obtain full licensure.
- Clarify that other documents prepared by or on behalf of the Department with regard to an investigation are confidential until such time as formal disciplinary charges are filed against the provider.
- Eliminate the “locality rule” for administrative law.
- Require the chief administrative official for each health care facility to report within 60 days any disciplinary action taken against an employee for matters related to ethics, incompetence or negligence, moral turpitude, or substance abuse, to the employee’s respective licensing board. All records pertaining to the disciplinary action shall be made available for examination to the licensing board.

This act became effective on May 2, 2017.

### **Public Chapter 230**

This legislation authorizes commissioners or supervising officials of departments to evaluate certain actions by a regulatory board to determine whether the action may constitute a potentially unreasonable restraint of trade. Supervising officials must ensure that the actions of regulatory boards that displace competition are consistent with a clearly articulated state policy. If a board action constitutes a potentially unreasonable restraint of free trade, the supervising official must conduct a further review of the action and either approve, remand or veto the action. The supervising official may not be licensed by, participate in, or have a financial interest in the occupation, business or trade regulated by the board who is subject to further review, nor be a voting or ex officio member of the board. The supervising official must provide written notice of any vetoed actions to the senate and house government operations committees.

Prior to filing a regulatory board's rule with the secretary of state, the commissioner or chief executive officer of the administrative department under which a regulatory board operates or to which a regulatory board is administratively attached, or a designee to the extent a conflict of interest may exist with respect to the commissioner or chief executive officer, must remand a rule that may constitute a potentially unreasonable restraint of trade to the regulatory board for additional information, further proceedings, or modification, if the rule is not consistent with a

clearly articulated state policy or law established by the general assembly with respect to the regulatory board. This act took effect on April 24, 2017.

### **Discussion – Public Chapter 274**

This legislation specifies that the practice of veterinary medicine does not include massage therapy to animals. This law became effective on May 4, 2017, but will expire on July 1, 2018.

Upon further review and discussion of this bill, the Board feels that Public Chapter 274 is in conflict with the intent and purpose of the Board and has serious concerns that the legislation, as currently written, will negatively impact the health and welfare of the animals and the citizens in the state of Tennessee. The Board requested that a letter be sent to the sponsors of the legislation requesting the opportunity to have input into any further legislation in order to ensure that a rational and functional framework can be formulated going forward.

### **Inspection Status Report**

A total of one hundred fifty-three (153) inspections were conducted during the period of March 2017 thru July 2017.

### **Director’s Report**
